## Changes to the Provincial Drug Schedules

The following additions and revisions to the Provincial Drug Schedules have been approved effective August 24, 2021 to reflect the NDSAC recommendations that were finalized on July 28, 2021:

- the Schedule I entry for herpes zoster vaccine has been revised as follows:
  - Herpes zoster (shingles) vaccine (live)
- the following has been added to Schedule II:
  - Herpes zoster (shingles) vaccine (non-live recombinant)
- the Schedule III entry for bisacodyl has been revised as follows:
  - Bisacodyl and its salts (except when sold in strengths of 5mg or less per oral dosage unit in package sizes containing no more than 105mg of bisacodyl, or 10mg or less per rectal dosage unit/suppository in package sizes containing no more than 50mg of bisacodyl)
- the Unscheduled entry for bisacodyl has been revised as follows:
  - Bisacodyl and its salts (when sold in strengths of 5mg or less per oral dosage unit, in package sizes containing no more than 105mg, or 10mg or less per rectal dosage unit/suppository, in package sizes containing no more than 50mg of bisacodyl)
