Changes to the Provincial Drug Schedules

The following changes to the Provincial Drug Schedules have been approved effective February 14, 2020 to reflect the NDSAC recommendation related to fluticasone propionate nasal spray, finalized on January 20, 2020:

- the relevant entry in Schedule II, has been revised as follows:
 - Fluticasone propionate, when sold for the treatment of allergic rhinitis in a nasal spray that delivers 50 mcg/spray for those 18 years of age and older, in package sizes containing more than ~~120~~360 metered sprays

- the relevant entry in Schedule III, has been revised as follows:
 - Fluticasone propionate, when sold for the treatment of allergic rhinitis in a nasal spray that delivers 50 mcg/spray for those 18 years of age and older, in package sizes containing no more than ~~120~~360 metered sprays
